TVA Rebates

Better home energy efficiency means a lower energy bill, increased indoor comfort and a reduced carbon footprint. Explore TVA’s money-saving rebates up to \$1500 for new HVAC, attic insulation, windows and more at energyright.com.

REMINDER: MLGW's 2023 Water Quality Report is available in English and Spanish at mlgw.com/waterquality.

Continued

With the growing need for mechanics at MLGW and nationwide, MLGW with the support of Memphis Shelby County Schools – College, Career and Technical Education and SWTCC decided to strengthen our boot camp program by creating our first automotive boot camp. Automotive campers from Cordova, Kingsbury and Craigmont high schools learned various automotive service principles which included advanced engine diagnostics and advanced transmission repair. All campers engaged in decision-making/critical thinking, industry math and communications, and utilized industry tools and equipment.

Creating career paths for high school students

Thirty-one students graduated from MLGW and Southwest Tennessee Community College’s Utility Construction and Automotive Technology Boot Camps on Friday, June 21. These three-week, comprehensive camps were designed to bridge the transition from high school to a prospective career at MLGW.

While it is the inaugural year for the Automotive Boot Camp, it is year two for the Utility Boot Camp.

Students from Whitehaven and Cordova high schools in the utility construction component of training underwent safety training and instruction in electrical, water and gas principles and completed the technical and physical ability assessments before they practiced climbing utility poles at the Macon Cove Campus of SWTCC.
